

Create a textured artwork with texture painting in Milan

Milan · Lombardy

- Duration: 2 h
- Art, Painting
- Up to 8 people per booking
- Free cancellation up to 48 hours before

In the heart of the Navigli, one of Milan's most creative and lively neighborhoods, this workshop is a space devoted to artistic experimentation and personal expression. Here, among canvases, colors and materials, you will discover texture painting, a contemporary technique that turns painting into a three-dimensional artwork full of texture and depth.

Guided step by step, you will work with texture pastes, palette knives and colors to create a one-of-a-kind painting, learning how to shape surfaces, build up relief and play with volumes and textures.

At the end of the workshop you can pose with your creation in a photo shoot and receive beautifully edited images that tell the story of your creative journey and showcase the final result.

What makes this experience special:

- Workshop dedicated to the texture painting technique
- Creation of a textured painting with three-dimensional effects
- Use of modeling pastes, colors and professional tools
- Layering and texture techniques, and color harmony
- Professional photo shoot with your artwork
