Nature takes shape inside glass through a workshop dedicated to the art of terrariums, small living ecosystems capable of enclosing balance, harmony, and botanical beauty in a single object. A creative and relaxing experience designed for those who wish to approach the world of plants through composition, design, and green care.

Guided step by step, you will create your personalized terrarium, learning how to build an ideal microclimate for plants, choosing the most suitable botanical elements and arranging them with aesthetic and natural balance. You will discover composition techniques, humidity management, and the small tricks that allow these ecosystems to remain lush over time.

An immersion in the world of contemporary greenery, where nature and creativity meet through a hands-on experience capable of transforming simple botanical elements into a living landscape to take home.
